

WIRSOL ENERGY ENVIRONMENTAL POLICY

WIRSOL are committed to ensuring our activities and commitments do not unnecessarily contribute to negatively impacting the environment. We will continually assess and review the environmental effects of our activities both on company premises and on site including the daily activities of associated works of sub-contractors pertinent to fulfilling WIRSOL client briefs.

We recognise the importance of environmental protection and are committed to operating the business responsibly and in full compliance with the statutory and regulatory bodies.

We will, as far as is reasonably practicable in order to achieve the requirements of the business objectives in relation to Environmental Policy and Management, provide training and information to employees on environmental issues including information on waste management, how to minimise energy wastage and, how to minimise the production of waste.

WIRSOL actively promotes the use of recyclable and renewable materials.

We promote the use of Site Waste Management Plans in conjunction with the Site Waste Management Plan Regulations 2008 in order to pre-plan, monitor and manage the use of waste and materials in associated WIRSOL project works.

We will monitor and control noise emissions from our works and operations and actively identify and engage alternative methods subject to reasonableness and practicality where appropriate in order to reduce the impact of noise from our operations on the natural environment.

We actively aim to reduce and limit the use and production of pollutants to water, air and land. This is further achieved through consultation with our suppliers and manufacturers, assessments of individual company Environmental Policies ensures through due diligence that we, as a company, will engage such organisations who have a similar commitment to Environmental Management and demonstrate such commitments through processes and procedures as highlighted within their individual company Environmental Policies. We aim to minimise the risk to the general public and employees from operations and activities undertaken by being proactive in our activities and methods of implementation as highlighted within our Environmental Policy Statement.

This Environmental Policy Statement is communicated to all employees, suppliers and sub-contractors and is made available to the public and is reviewed bi-annually by the company Managing Director and all responsibility of its overarching implementation and review rests with him.
